### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

### DETAILED ACTION

Claims 1-8 are present for examination.

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a computer readable medium having stored thereon it a nucleotide sequence (SEQ ID NO: 1, classified in class 702, subclass 19.
- II. Claims 1-5, drawn to a computer readable medium having stored thereon it an amino acid sequence (SEQ ID NO: 2), classified in class 702, subclass 19.
- III. Claims 6-8, drawn to a method for comparing a first sequence (SEQ ID NO: 1) to a reference, classified in class 435, subclass 6.
- IV. Claims 6-8, drawn to a method for comparing a first sequence (SEQ ID NO: 2) to a reference, classified in class 435, subclass 6.

It is acknowledged that the claims are each grouped in more than one group.

The claims will be examined to the extent that they read on the elected group.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 1652

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the two different groups drawn to a computer readable medium having stored thereon either a nucleotide sequence (Group I) or an amino acid sequence (Group II) each comprise different sequence information. Group I comprises a computer readable medium having stored thereon a nucleotide sequence, whereas group II comprises a computer readable medium having stored thereon and amino acid sequence.

The methods of Groups III and IV are independent as they comprise different steps, utilize different products and produce different results.

Inventions I and II and inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case computer readable mediums of groups I and II can each be used to perform other processes such as that of sequence data storage and the process of inventions III and IV can each be practiced in ones mind without the use of the computer readable mediums of groups I and II.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1652

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.

Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l). Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard G Hutson whose telephone number is (703) 308-0066. The examiner can normally be reached on 7:30 am to 4:00 pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on (703) 308-3804.
